

Agrochemicals and Biopesticides

Regulatory Science at SCC

The Agrochemicals and Biopesticides Department at SCC is concerned with the regulatory aspects of getting your plant protection products onto the market. For scientific aspects of the registration, SCC uses the expertise of its Regulatory Science Department, the largest group within SCC.

The experts in SCC's Regulatory Science unit know exactly what the optimal dossier needs to look like, how to perform state-of-the-art risk assessments, as well as knowing which studies and expert statements have to be included where. We have frequently demonstrated successful dossier submission and defense of compounds with our expert work.

The experience and detailed knowledge of the Regulatory Science unit means that SCC provides its clients with clear budgetary estimates along with fast-track, experienced, professional service to assist in obtaining registration.

We take care!

Let SCC be your specialist for the registration of plant protection products!

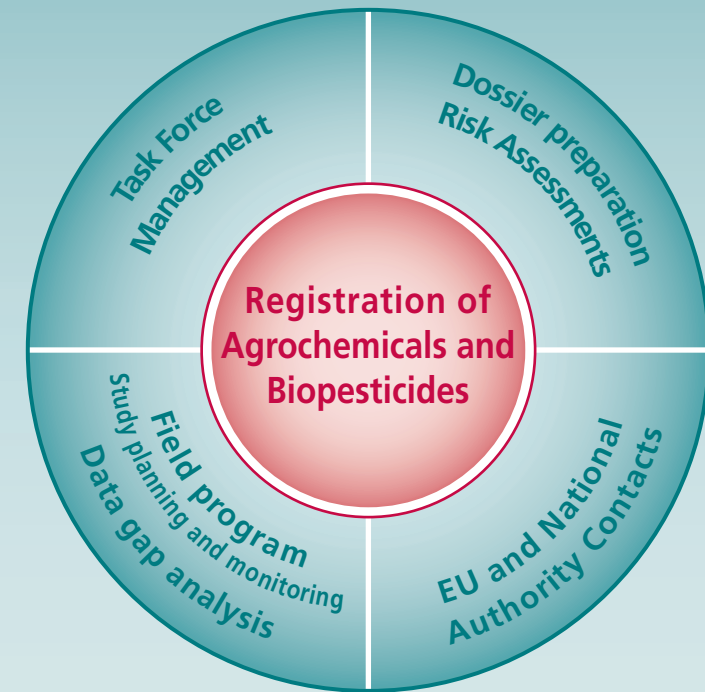

Scientific Consulting Company (SCC) was founded in 1989 by our president, Dr. Friedbert Pistel. SCC is today one of Europe's leading privately-owned and independent consulting companies for the registration of agrochemicals and biopesticides, biocides, chemicals, consumer products, feed & food additives and veterinary medicine. SCC is independent: it intentionally does not have laboratories of its own and is therefore free to cooperate with any laboratory which best suits the needs of its clients.

Registration of Agrochemicals and Biopesticides

Having worked in the field of plant protection product registration since 1989, SCC has prepared over 300 dossiers for the plant protection products industry according to 91/414/EEC.

Our experience includes the preparation, submission and defence of dossiers for new and existing active substances and products on EU Commission and national European or zonal levels.

SCC commands detailed knowledge of written and unwritten laws, regulations and procedures. Our expertise and contacts enable us to put together the optimal portfolio of studies and expert statements for your products.

Our areas of expertise include:

Registration of new agrochemicals/biopesticides and renewal of active substances

- Data analysis according to Regulation 544/2011 and 545/2011 and upcoming requirements
- Testing strategy and updating statements
- Study planning/monitoring; field programs/lab testing
- Dossier preparation according to Regulation 1107/2009, including risk assessments and modelling

Step 1 and Step 2 procedure after Annex I inclusion and zonal applications

- Equivalence proof of the technical active substance
- dRR preparation (risk envelope and zonal approaches) including Efficacy section
- National appendices including Efficacy sections
- Applications for mutual recognition

If you want your products on the market as soon as possible, and have no intention of spending your resources on dealing with authorities, let us take care of the legal aspects, directives, forms and regulatory procedures.

CADDY Dossier Preparation and Archive Services

SCC has extensive experience in the preparation of CADDY dossiers. Using our exclusive Electronic Document and Dossier Management System (EDDMS), we can quickly and easily prepare your CADDY dossier.
