

BIOCIDES

Regulatory Science at SCC

The Biocides Department at **SCC** is concerned with the regulatory aspects of dossier submissions. For the scientific aspects, **SCC** uses the expertise of its Regulatory Science Department, the largest group within **SCC**.

The experts in **SCC's** Regulatory Science unit know exactly what the optimal dossier needs to look like, how to perform state-of-the-art risk assessments, as well as knowing which studies and expert statements have to be included where. We have frequently demonstrated successful dossier submission and defense of compounds with our expert work.

The experience and detailed knowledge of the Regulatory Science unit means that **SCC** provides its clients with clear budgetary estimates along with fast-track, experienced, professional service to assist in obtaining registration.

We take care!

Let SCC be your specialist for biocides regulatory affairs!

Scientific Consulting Company (**SCC**) was founded in 1989 by our president, Dr. Friedbert Pistel. **SCC** is today one of Europe's leading privately-owned and independent consulting companies for the registration of agrochemicals and biopesticides, biocides, chemicals, consumer products, feed & food additives and veterinary medicine. **SCC** is independent: it intentionally does not have laboratories of its own and is therefore free to co-operate with any laboratory which best suits the needs of its clients.

Our services for the Biocides Industry

The Biocides Department at SCC was established in 2000 and has successfully submitted numerous dossiers for existing biocidal active substances according to Directive 98/8/EC.

Currently, we are involved twofold - defending active substance dossiers already submitted and preparing dossiers for biocidal products.

Before product authorisation starts, we are prepared to negotiate with national authorities on your behalf to develop an acceptable data package, while reducing the complexity and costs of the product dossier as far as possible.

We provide:

- Detailed analysis of your database in order to define possible data gaps.
- Study planning and monitoring. We can assist you with any type of study: analytics, physico-chemical properties, efficacy, e-fate and ecotox and toxicology.
- Performance of risk assessments for the environment and human health.
- Preparation and submission of dossiers for active substances and biocidal products including preparation of state-of-the-art IUCLID 5 files.
- Defense of submitted dossiers.

We can assist you with all issues related to regulatory affairs for biocides:

- Give support in defining your registration strategy for the authorisation of your biocidal products portfolio on the national level.
- Either guide you through the process of Annex I inclusion for any existing or new biocidal substance, or take over all-inclusive responsibility for your regulatory projects.
- Share our experience in setting up and managing complex Task Forces.
