

EDDMS

Electronic Document
and Dossier
Management System

Let SCC be your specialist for EDDMS!

Tracking of studies

- Tracks studies through the administrative channels within the regulatory authorities
- Core information regarding the submission of a study can be retrieved: when it was submitted, for what purpose, to which authority
- Easy tracking for multiple submissions

Comprehensive search and archiving function

- Information regarding client's various substances are linked to one another, making comprehensive searches possible
- Regulatory and scientific key words are assigned, making database searches easier
- Keywords and specific groupings have been developed by SCC and are continually adapted to the developments in the regulatory world

Study compensation / multiple user needs

- Due to data sharing and data compensation considerations resulting from consortia and task forces, study costs can be inserted
- Access to studies and database views can be restricted to user subgroups to guarantee confidentiality

Software/technical service

- No specific software necessary
- Easy installation
- Automatic download of updates

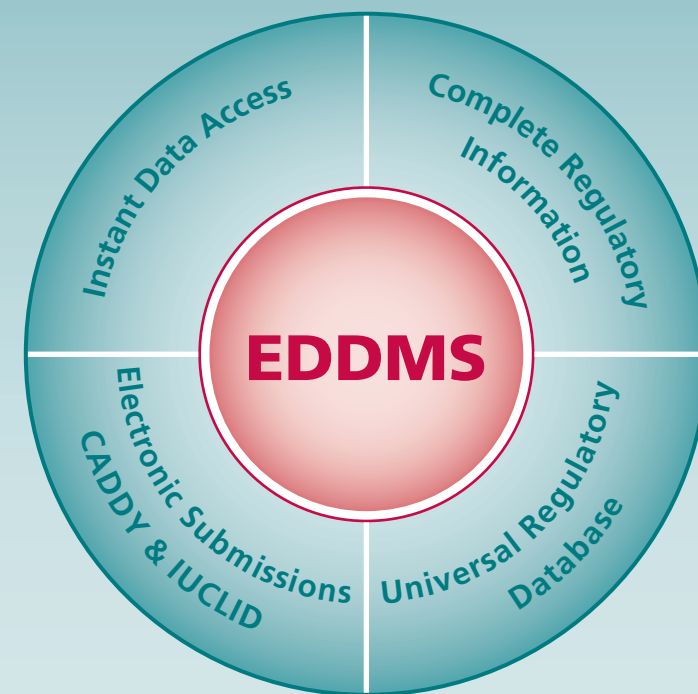

Scientific Consulting Company (SCC) was founded in 1989 by our president, Dr. Friedbert Pistel. SCC is today one of Europe's leading privately-owned and independent consulting companies for the registration of agrochemicals and biopesticides, biocides, chemicals, consumer products, feed & food additives and veterinary medicine. EDDMS is the result of a continual, long-term development of a specialised regulatory database system by SCC, and is now available for our clients!

The universal regulatory database!

The "regulatory world" has become more and more complicated and complex. The preparation of a regulatory dossier has developed into an extremely demanding task in terms of scientific and administrative requirements. Extensive dossiers covering multiple data requirements must be generated by the applicant, requiring reliable documentation and tracking of submissions and corresponding information.

Doc. No.	Report No.	Report title	Year	Index	Author	Language	Public
0001	001	STABILITY OF VODAFONE 1000	2003	001	111, 120, 121	EN	No
0002	002	STABILITY OF VODAFONE 1000	2003	002	111, 120, 121	EN	No
0003	003	STABILITY OF VODAFONE 1000	2003	003	111, 120, 121	EN	No
0004	004	STABILITY OF VODAFONE 1000	2003	004	111, 120, 121	EN	No
0005	005	STABILITY OF VODAFONE 1000	2003	005	111, 120, 121	EN	No

With experience obtained over almost two decades of working for the chemical industry and knowledge acquired from hundreds of dossier preparations and international submissions, SCC has developed its new regulatory database system.

Let the advantages of

work for you!

- Universal use, independent of regulatory area
- Easy update guaranteed through SCC's update service or client's in-house capacity
- Instant data access on individual PCs, computer networks or on a global scale, depending on your organisation
- Complete regulatory information at hand everywhere you need it, including electronic documents, submission details and project documentation
- Flexibility for your specific in-house needs, including integration of already existing databases, guaranteed by SCC specialists

The solution for your data management!

SCC EDDMS can be used for all regulatory submissions: for chemicals (REACH), plant protection products, biocides, pharmaceuticals or consumer products, or any other type of products.

Data administration

- Compiles scientific reports and expert statements for the dossier
- Takes care of related data administration
- Direct viewing of integrated electronic files
- Confidentiality and ownership rights can be fully guaranteed by selective views

Data presentation

- Data can be stored, retrieved and formatted according to the specific requirements of the client or the regulatory authority, worldwide
- Select and print out lists with information regarding your substance / product / submission
- Simplified compilation of CADDY and IUCLID
- Simplified generation of reference lists in any format
- Customized profile: sorting, data to be shown, presentation of data
- Lists can be saved, amended and re-saved, eliminating the need to re-generate and re-do work already performed
